Dear Len & Anna

LETTER OF TESTIMONIAL

- ELECTRICAL WORKS PERFORMED FOR MAPEL BUILDING PTY LTD

We are writing in support of Len & Anna's electrical contracting business United Electrical Contracting WA Pty Ltd. (UEC) and the work performed for our firm Mapel Building Pty Ltd (Mapel).

Most of Mapel's project work involves the construction of new commercial and industrial design and construct building and development projects, generally within the greater Perth metropolitan area. These projects generally involve electrical subcontracts which range in value from \$10,000 to \$500,000.

Mapel has been a customer of UEC since 2007. We have engaged UEC to complete electrical works on over 100 projects to date and look forward to continuing doing so in the future.

It is clear in dealing with UEC that the business is built on much more than the offer of a quality electrical contracting service. As should always be the case, it is evident that the effort put in by Len and Anna in maintaining an excellent relationship between UEC and its clients, is given a high priority and placed at the forefront of their service offering. This has been highly evident in their dealings and history in dealing with our firm.

We would have no hesitation in recommending UEC due to the quality of their work, fair pricing, attention to detail and ease of dealing that we have come to know and expect in our dealings with them.

Thankyou once again Len and Anna and we look forward to working with you both for many years to come.

Yours faithfully,

ANDREW ROBERTS
