

# TESTIMONIAL

I have known United Electrical Contracting Pty Ltd and Len Perich since 2008 when the company was contracted by Mapel Building to perform the electrical fit out of a 2750 sqm warehouse and office in Kwinana Beach for me. The work included the connection of air conditioning, cranes, general power distribution, office and high bay lights.

Since that time, I have used United and Len to carry out electrical maintenance work at that property and several other similar properties in Cockburn Central and Canning Vale.

In more recent times United Electrical and Len have performed several electrical projects related to the electric vehicle chargers. These include installations and making up of specialised cables.

I have found United and Len easy to work with, they are on time, organised and get the job done efficiently.

I have no hesitation recommending United Electrical Contractors and Len Perich to any company looking to use their services and experience.
